CONTENT ANALYSIS: RACIAL RESENTMENT LITERATURE

A content analysis of three generalist journals (*APSR, AJPS, JOP)* and three specialty journals (*Public Opinion Quarterly, Political Behavior,* and *Political Psychology)* from 1996-2010 supports this claim. In the 103 articles and research notes that used the terms "racial resentment" or "symbolic racism," 41 articles conducted some statistical analysis of racial resentment (62 mentioned the terms in passing). Of these 41 articles, 73% focused solely on whites. Of the 11 studies that analyzed whites and blacks, 8 estimated a single coefficient for racial resentment's effect on public opinion among whites and blacks. Two report the difference in means of racial resentment across blacks and whites (Kinder and Winter 2001; Henry and Sears 2002), but neither examines the coefficient for racial resentment for whites and blacks separately. Only *one* article (Hetherington and Globetti 2002) estimates separate coefficients for blacks and whites, but racial resentment is secondary to the focus of the article and not discussed in the article text. We are only aware of two citations outside our content analysis that examine the effects of racial resentment among African-Americans. Tesler and Sears (2010) correlate racial resentment and vote choice among African-Americans in 2008 but provide little conceptual explanation. Orey et al. (2012) assess how racial resentment affects support for racial policies, welfare, and reparations but the analysis is limited to an African-American college student sample and thus does not compare whites and blacks.

SSI Survey Details

The survey took place in March 2013. For 25% of our white respondents and 25% of our black respondents, the high school degree is the highest level of education attained. 29% of whites are Republicans, 33% are Democrats, and 30% are Independents; 7% of blacks are Republicans, 70% are Democrats, and 16% are Independents. 52% of whites and 52% of blacks are female. The average age is 44 among whites; 37 among blacks.

Control Variables

Partisanship: 7-category variable ranging from 0 (Strong Democrat) to 1 (Strong Republican).
Ideology: 7-category variable ranging from 0 (Very liberal) to 1 (very conservative).
Age: Dummy variables for ages 18-29 and ages 30-59; ages 60+ set as baseline.
Education: 7-category variable ranging from 0 (8th grade) to 1 (advanced degree).
Political Awareness: Four-item additive index ranging from 0 (least) to 1 (most), α=0.59.
Family Income: 9-category variable ranging from 0 (<$10K) to 1 ($150K+).
Female: Dummy variable coded 1 for female respondents.

OPEN-ENDED CODING PROTOCOL

22% of all responses were coded by both coders. These double-coded responses are used to generate the kappa intercoder reliability statistics.

Codeable content? (code)
0=no (use if: blank/R writes don't know/R agrees or disagrees with question/general rule-one word answers are not code-able with the exceptions of equality or racism)
1=yes (use if: R provides any idea that is understandable and suggests some potentially code-able reaction to the question-including remarks about the question wording/bias in the questions/vagueness in the questions)
Agreement= 94.99%; κ =0.88

Blacks explicitly Mentioned (bexpment)
0 = no blacks explicitly mentioned
1 = blacks explicitly mentioned
Agreement= 94.60%; κ =0.88

Whites explicitly mentioned (wexpment)
0= no whites explicitly mentioned
1= whites explicit (including Irish, Italians, Jews)
Agreement= 95.46%; κ =0.79

Traits of Blacks (tblk) –explicit mentions of dispositions or characteristics
0=no mention
1=positive (endorsed or mentioned with no sign of disagreement: hardworking, self-reliant; suffering/struggling/facing/overcoming adversity overcoming race, and or smart)
2=positive & negative (endorsed or mentioned with no sign of disagreement)
3= negative (endorsed or mentioned with no sign of disagreement/ lazy, dependent / not taking responsibility for oneself / making excuses/ not overcoming adversity/taking advantage of "race" card/ angry/ dwelling on the past/ and or poor, low SES, uneducated)
11=Society – positive (but R disagrees)
12=Society – negative (but R disagrees)
21=blacks are like other groups in disposition; "blacks and whites are"
Agreement= 86.74%; κ =0.70

Individualism / American Dream / "work your way up"/ self-determination (individ)
0 = no individualism mentioned
1 = affirmation of individualism as a principle-mentioned as an existing rule for all/universal (need a specific reference to working hard/helping oneself/earning one's way/doing it on one's own/other minorities worked their way up, blacks should too/ explicit mention of another group)
2 = mentioned as "not enough" ("trying is not enough" for blacks/blacks are trying harder/blacks have to try harder/reference to the American dream being broken)
3 = some people (any race) try to flout individualism ("get something for nothing"/ being lazy/not trying hard/blacks get more than they deserve/blacks are the favored race)
Agreement= 75.57%; κ =0.63

Discrimination (discrim)
0= no mention
1 = against discrimination; it should not exist; for equality
2 = against discrimination but not for special treatment; against special treatment/privilege based on race
10= discrimination mentioned broadly
11= exists / is a problem for blacks (is a problem/blacks face stereotypes/racial pigment makes a difference/legacy of slavery)
21 = exists and is a problem for whites (discrimination against whites/reverse racism/ special favors)
31= discrimination not as big of a problem as before and or slavery happened but is not the source of current problems/ blaming the past is not taking responsibility for individual actions/denial of continuing discrimination against blacks/ denial of a discriminatory societal feature that has an effect on blacks
41 = discrimination is a problem for everyone; "everyone is a little bit racist"
51 = "this is not a race thing" (misc, could be disposition, could be situation)
Agreement= 60.73%; κ =0.53

Welfare(welf)- explicit mentions of welfare (this code should not capture affirmative action)
0= no mention
1= discussion of welfare/welfare programs/government programs; checks; dependency; handouts; public aid; food stamps; TANF
Agreement= 97.03%; κ =0.64

Obama explicitly mentioned(obama)
0= no mention of Obama
1 = mentioned Obama
Agreement= 99.65%; κ =0.92

Reactions to the questions themselves (rxn)
0=no reaction
1=racist /biased/prejudice
2=emotionally upset/angry
3=dispute accuracy of statement/question statement
4= state that it is a stupid question
5= don't understand question
Agreement= 93.21%; κ =0.6

APPENDIX TABLE 1. RACIAL RESENTMENT INSTRUMENTATION AND DESCRIPTIVE STATISTICS

Do you agree strongly, agree somewhat, neither agree nor disagree, disagree somewhat, or disagree strongly with this statement?

	SSI 2013			**ANES 2008**		
	White Rs	Black Rs	Difference	White Rs	Black Rs	Difference
Irish, Italians, Jewish and many other minorities overcame prejudice and worked their way up. Blacks should do the same without any special favors.	0.69 (0.01)	0.53 (0.02)	0.17 (0.02)	0.73 (0.01)	0.61 (0.02)	0.12 (0.02)
Generations of slavery and discrimination have created conditions that make it difficult for blacks to work their way out of the lower class.	0.61 (0.01)	0.37 (0.02)	0.24 (0.01)	0.57 (0.01)	0.35 (0.02)	0.22 (0.02)
Over the past few years blacks have gotten less than they deserve.	0.62 (0.01)	0.40 (0.02)	0.22 (0.01)	0.65 (0.01)	0.36 (0.02)	0.29 (0.02)
It's really a matter of some people not trying hard enough; if blacks would only try harder they could be just as well off as whites.	0.54 (0.01)	0.44 (0.01)	0.10 (0.02)	0.64 (0.01)	0.55 (0.02)	0.09 (0.02)
Overall additive scale	0.62 (0.01)	0.43 (0.01)	0.18 (0.01)	0.65 (0.01)	0.47 (0.01)	0.18 (0.01)

SSI Overall N= 1817, unweighted. ANES Overall N = 1702, weighted.
Responses coded from 0 (least racially resentful) to 1 (most racially resentful).
All within-survey differences between blacks and whites are significant at $p<0.01$.

APPENDIX TABLE 2. FACTOR ANALYSIS OF OPEN-ENDED MENTIONS

	Whites + Blacks	Whites	Blacks
Negative Traits of Blacks	0.50	0.52	0.55
Positive Traits of Blacks	-0.07	-0.00	-0.09
Individualism as a Rule	0.33	0.25	0.30
Individualism Flouted	0.59	0.60	0.59
Individualism Not Enough	-0.40	-0.37	-0.27
Discrimination a Problem	-0.47	-0.45	-0.24
Discrimination not a Problem	0.49	0.44	0.45
Reverse Discrimination	0.31	0.30	0.09
Factor 1 eigenvalue	1.43	1.30	1.08
Factor 2 eigenvalue	0.63	0.60	0.73
Factor 3 eigenvalue	0.14	0.16	0.16
Factor 4 eigenvalue	0.03	0.06	0.04
N	1573	834	739

Principal factors, unrotated. Only factor loadings for Factor 1 listed.

	Ideological Liberals	Ideological Conservatives
Negative Traits of Blacks	0.53	0.53
Positive Traits of Blacks	0.07	-0.15
Individualism as a Rule	0.38	0.29
Individualism Flouted	0.59	0.62
Individualism Not Enough	-0.23	-0.45
Discrimination a Problem	-0.37	-0.48
Discrimination not a Problem	0.57	0.38
Reverse Discrimination	0.21	0.28
Factor 1 eigenvalue	1.33	1.42
Factor 2 eigenvalue	0.72	0.52
Factor 3 eigenvalue	0.22	0.10
Factor 4 eigenvalue	0.01	0.07
N	474	408

Principal factors, unrotated. Only factor loadings for Factor 1 listed.
